

# Unite Your Enterprise!

Jitterbit is the integration platform of choice for connecting applications in the cloud with enterprise applications, databases, and legacy systems.

## Intuitive Design & Management

Regardless of how simple or complex your integration, all aspects of your project – from data mapping to business logic - are in one place.

- Drag-and-drop data between systems in the fully graphical “No Code” design environment for a quick and easy integration.
- Add business logic using the formula builder to completely automate an entire business process.
- Managing and enhancing your integration is a breeze.

## Robust and Reliable Architecture

It’s important to know what’s under the hood when you select an integration solution. As your business requirements change, you have peace of mind knowing that Jitterbit is built to support all of your integration needs no matter how large or small.

- Multi-threaded architecture
- Design to easily scale as requirements grow
- Optimized for Windows, Linux and Solaris

## Maximized Business Value

A strong integration solution allows you to focus on what data you need rather than how to get it. With the freedom to move information between any system, you have the power to run your business the way you want.

- Used across Fortune 15 & SMBs
- Annual subscription pricing for the lowest TCO & fastest ROI
- Up to 90% lower operating costs vs. proprietary & appliance alternatives

# Powerful. Flexible. Easy.

Jitterbit has been designed with an intelligent graphical user interface that allows salesforce.com customers to complete integration projects without ever writing a single line of code. With native "out of the box" connectivity to over 250 systems you can download and begin building your integrations in a matter of minutes.

Jitterbit makes it possible to integrate today with:

- A pre-built salesforce.com connector that provides connectivity to Salesforce without any need to learn salesforce.com APIs and WSDLs
- Support for all salesforce.com objects, including custom objects
- AppExchange certification by salesforce.com that ensures proven and reliable connectivity
- Seamless support for all salesforce.com enterprise and partners WSDLs

## Accelerate Your Integration

Leveraging our domain expertise, Jitterbit pioneered the pre-built integration template called the "Jitterpak". Jitterpaks are portable and sharable documents that include everything necessary to complete a standard Salesforce integration. Jitterbit users can import, export, and share every aspect of a salesforce.com integration, including document definitions, data mappings and transformations, and operations.

With support for all Salesforce operations like Create, Delete, Update, Upsert, Query, etc., Jitterpaks give you a jump start on synchronizing your master lists of customers, products, prices, previous order histories, and much more!
