

BigCommerce Integration from Jitterbit

Integrate BigCommerce with your systems to eliminate manual processes and improve the customer buying experience.

You rely on BigCommerce to elevate your business with enterprise e-commerce capabilities, but you need end-to-end connectivity between BigCommerce and your ERP, CRM, and back-end systems to eliminate data silos and to automate e-commerce workflows.

One Platform to Connect to Your Many Systems

Our integration solutions enable businesses to connect their systems to BigCommerce. Jitterbit offers pre-built integrations, specific to BigCommerce, ensuring a seamless connection between BigCommerce and any unique combination of back-end systems.

Our BigCommerce integration solution connects BigCommerce to your ERP and automates critical business processes and data transfers between the two. This reduces manual processes such as order, shipment, and inventory processing, provides a single source of truth for e-commerce data, and eliminates errors and silos by ensuring data consistency across applications with automation.

JUST A SAMPLE OF THE APPLICATIONS AND SYSTEMS WE CAN INTEGRATE BIGCOMMERCE WITH

BigCommerce Integration Features

- Automate the data exchange between BigCommerce and your ERP, CRM, or back-end systems
- Automate real-time inventory updates between your web store, store, warehouse, and more
- Shipping details are automatically passed back to BigCommerce upon order fulfillment
- Automate pricing and product updates across platforms in real-time

Benefits of Integration

- Automate processes and data integration across systems to maintain customer, product, order, and shipping data
- 95% of customers achieve ROI from our deployments in less than a year
- Keep inventory levels, pricing, and shipping information consistent across systems and marketplaces
- Improve data accuracy by reducing transactional errors by up to 40%
- Speed up your order-to-cash cycle time by 20%+
- Accelerate time to deployment by up to 80% with pre-built integrations

Why Brands Choose Jitterbit

Jitterbit offers more than two decades of retail and commerce experience including Nalpak Inc., who has been making Tuffpak hard-sided cases for over 30 years, and also offers flashlights, multi-tools, knives, and a full-line uniform shop, servicing police departments throughout San Diego County. Today we provide them with integration between BigCommerce and Sage 100 to automate the processing of orders, inventory updates and product data, and sending shipment updates.

B2B Bundle Integration

- We support Bundle B2B integration within BigCommerce
- We can automate customer, order, SKU data, and more to your web store and ERP
- We can automate customer and pricing segmentation, punch out, POs, and net payment terms, user roles, and integrations with major ERP, order management, and CRM systems
