

Energy & Utilities

GET CONNECTED AND KEEP
THE LIGHTS ON

“Bounce embraces new technologies in order to offer our customers better products. Jitterbit is part of the foundation that allows us to do this.”

– KARL TROLLINGER, CMO, BOUNCE ENERGY

It takes a lot of work to keep the lights on—and bill customers appropriately. Successful energy providers must connect many different systems to track customer usage, monitor energy availability, and send and process bills. The more manual or slower this process is, the less accurate it becomes, and the more frustrated customers are about their service.

Jitterbit revolutionizes energy operations by making integration fast, simple, and effective. Getting real-time insight into the right applications and data types helps energy companies optimize and automate processes, make better resource allocation decisions, and manage business operations more intelligently. With the improved visibility Jitterbit provides, energy and utility companies can more easily keep core operations running and identify new opportunities for expansion as well.

ENERGY & UTILITIES INDUSTRY BENEFITS

- ✓ Quickly support major industry standards
- ✓ Stay current with government requirements
- ✓ Automate customer fulfillment and payments based on usage data
- ✓ Operate more efficiently with improved visibility into supply and demand

BENEFITS OF CONNECTIVITY

- ✓ Gain real-time visibility into all aspects of the business
- ✓ Save time and empower employees to focus on their core jobs
- ✓ Ensure that data is accurate and synchronized everywhere
- ✓ Automate processes and streamline business operations
- ✓ Enable real-time customer self-service
- ✓ Customize sales and marketing offers for customers
- ✓ Realize return on investment quickly, with low total cost of ownership

CUSTOMER SUCCESS

Bounce Energy, an electricity service provider, needed a way to manage EDI transactions between its own systems, state governments, and partners. Bounce wanted to avoid building, managing, and scaling a cumbersome custom-built integration, and sought an out-of-the-box solution it could start using right away. Jitterbit's built-in support for EDI enabled it to quickly process large amounts of data for Bounce, ensuring that accurate information reached every application that needed it—giving Bounce a competitive advantage over other energy providers forced to spend a lot of time and effort on integration.

Get Your Apps In Harmony

Jitterbit Harmony provides a graphical, code-free approach to simplify integration between data, apps, and devices.

Design, deploy, and manage connections between apps without custom code.

DESIGN YOUR INTEGRATION

- Connect any data, app, or device
- Intelligently map data fields
- Build powerful workflows
- Automate business processes to streamline operations
- Get started fast with “Jitterpak” templates

DEPLOY ANYWHERE

- Run cloud, on-premise, or hybrid
- Create secure local connections with lightweight agents
- Scale elastically to meet needs in real time
- Count on high availability with smart agent groups

MANAGE FROM ANY DEVICE

- Manage from the Harmony Cloud
- Provide secure access with user-based permissions
- Get real-time alerts and complete audit trail
- Optimize intelligently across unlimited environments

Harmony users deploy their first integration in a matter of days!

Standards-Based Connectivity

- HTTP/S
- Web Services (SOAP, REST)
- ODBC
- JDBC
- FTP
- File Shares
- LDAP
- SMTP/POP3

Data Formats

- XML-(WSDL, XSD)
- All EDI (EDIFACT, HL7, etc)
- Flat Text Structures
- Hierarchical Text Structures

Platforms

Cloud, Windows, Mac, Linux

Enterprise Applications

- Salesforce
- NetSuite
- SAP
- Microsoft Dynamics
- Siebel
- PeopleSoft
- Oracle EBS
- JD Edwards
- Workday
- Marketo
- and more...

Databases

- Oracle
- SQL Server
- DB2
- MySQL
- Sybase
- Teradata
- and more...

Files

- Web Services
- XML
- Flat and Hierarchic Structures
- Legacy
- Active Directory
- LDAP
- and more...
