

Connect NetSuite and Salesforce Fast for Better Business Results

NetSuite offers a powerful back-office ERP system for handling finance and accounting, while Salesforce provides an industry-leading front-end CRM tool for sales, marketing, and service. Each tool has its own benefits, but using them in concert drives superior business results.

Jitterbit's NetSuite Connect solution was built with Jitterbit's unparalleled domain expertise, delivering the powerful combination of pre-configured flows and hands-on implementation services that make it fast and easy to connect common NetSuite to Salesforce business flows. Out-of-the-box integration between common data and business processes dramatically speeds deployments, shortens your time to value, and decreases your total cost of ownership. Dynamic configuration options allow integrations to be customized to your unique business requirements and ensure maximum returns on your technology investments.

Used by organizations across every industry, NetSuite Connect is a must for any business that depends on NetSuite and Salesforce for its success. Get connected in days and see results immediately.

NetSuite Connect includes a package of pre-configured flows and hands-on implementation from our team of domain experts. The result is that you can rapidly synchronize and automate the most popular front- and back-office data and business processes.

Pre-configured Flows for Rapid Deployment

NetSuite Connect Benefits

Get Integrations Up and Running Fast

- Use pre-built flows for common integration flows.
- Take advantage of best practices and domain expertise with hands-on implementations.
- Run everything 100% in the cloud or optionally deploy on-premise.
- Manage integrations from any device and setup proactive alerts.

Handle Common Tasks with Ease

- Easily create timely and accurate sales quotes or generate sales orders.
- Amplify your lead-to-cash process and cash flow by connecting your front and back office.
- Eliminate manual data entry and the costly errors that result.
- Give Sales and Service Reps complete access to invoices, orders, credits, holds and more.
- Enhance customer satisfaction with visibility to order, shipping, billing, cases and other information.
- Better manage your customer relationship from initial sale to fulfillment and invoicing.

Take Integrations to the Next Level

- Powerful configuration options.
- Connect additional endpoints to expand to new use cases.
- Build real-time, scheduled, or batch integrations.
- Customize data or workflows.
- Work with Jitterbit experts to fast-track success with complex connections.

SOLUTIONS BUILT ON DOMAIN EXPERTISE
