

Connected Commerce. Integration Made Easy.

Integration solutions for omnichannel commerce

The explosive growth in digital commerce – driven by the pandemic as well as other factors – is here to stay. This means that merchants need to connect their e-commerce systems with the rest of the applications that operate the business to provide great buying experiences for customers online or in-person.

Jitterbit's solutions enable fast, flexible integration between on-premises and cloud applications. Use reliable, scalable integrations that automate workflows like syncing orders and customer data from e-commerce stores to ERP and accounting systems, and sending inventory and shipment updates back to stores automatically.

A Powerful Integration Platform

Increase data accuracy, achieve widespread automation, and drive new business

- ✓ Deep domain expertise
- ✓ Pre-built integrations accelerate time to deployment by up to 80%
- ✓ Bi-directional, automated data integration between your e-commerce stores and your ERP
- ✓ Additional integrations like online marketplaces and EDI trading partners
- ✓ Save time and resources, eliminate errors due to manual data entry with no need for CSV uploads
- ✓ Shared business rules replace the need for mapping and reduce the total cost of ownership

END-TO-END COMMERCE

Eliminate data silos and create a complete view of your customers

CUSTOMIZE EXPERIENCES

Configure workflow integrations based on your industry best practices

GET RAPID ROI

Accelerate time to deployment by up to 80% with out-of-the-box solutions

ACCELERATE GROWTH

Drive innovation and scale your business via reusable, extensible capabilities

Jitterbit empowers businesses to optimize their connectivity and scalability through a single integration and workflow automation platform. Our mission is to turn complexity into simplicity so your entire organization can work faster and more efficiently.
