

Unlock More Value with Jitterbit App Builder v4

AI, automation and a superior developer experience
— all in one powerful upgrade

Empower Every Developer

Jitterbit App Builder v4 elevates low-code development, empowering both professional developers and citizen developers to create secure, scalable and compliant enterprise applications with ease.

With AI-infused tools and a more modern user experience, it allows teams across your organization to build apps faster and more collaboratively, reducing reliance on IT.

What's New in v4?

- **AI-Powered Productivity:** Build, manage and maintain applications using natural language with App Builder AI Assistant
- **Improved Developer & End-User Experience:** Take advantage of enhanced UI, easier maintenance and intuitive workflows across the board
- **Expanded Integration Ecosystem:** Benefit from new and updated connectors and drivers for seamless integration
- **Improved Platform Features:** Access enhanced platform features, including .NET 8 support, offline mode and Docker support

The Bottom Line: Why It Matters for You

Upgrading to v4 isn't just a technical decision — it's a strategic one. Here's what's in it for your business:

- **Lower Total Cost of Ownership:** Reduce maintenance burden with a more efficient and stable platform.
- **Accelerated Time-to-Value:** Decrease IT overhead and enable more teams to deliver apps faster by leveraging AI and low-code.
- **Next-Gen Capabilities:** Enjoy the latest in automation, AI, security and scalability with new and upcoming platform innovations.

Take the Next Step

Get more from your investment. Upgrade to App Builder v4 and unlock greater agility, efficiency and ROI across your organization. For more information, please refer to the [release notes](#), visit our [documentation](#) site or contact your CSM.
