

# Harmony EDI Bundle

Simplify B2B Connectivity with Conversational EDI and Integration

## Unify EDI and Application Integration

The **Jitterbit Harmony EDI Bundle** unifies B2B connectivity and application integration into a single, scalable platform. It combines enterprise-grade EDI and iPaaS — allowing organizations to seamlessly exchange critical business documents, such as purchase orders and invoices, with global networks of partners, suppliers and vendors.

Powered by the [Jitterbit EDI AI Assistant](#), the platform features a natural language chat interface that transforms the way you interact with your data. Non-technical users can now manage day-to-day requirements independently, checking real-time purchase order statuses, onboarding trading partners, and validating invoices directly via conversational prompts.

## What's Included in the Bundle:

- **Unified Integration Platform:** Tap into the complete power of the AI-infused, low-code Jitterbit Harmony platform ([EDI](#) + [iPaaS](#)) to quickly integrate cloud, on-prem and legacy systems.
- **EDI AI Assistant:** Use a natural language interface to democratize the management of day-to-day EDI tasks, reduce complexity and uncover insights faster.
- **60 Hours of Professional Services:** Ensure fast, effective and successful EDI deployment that complies with best practices, optimizes automation outcomes and delivers immediate results.

## The Benefits of the Harmony EDI Bundle

- **Accelerate Time to Value:** Onboard trading partners, manage transactions, and troubleshoot EDI using simple natural-language prompts — dramatically reducing the time and complexity required to manage your B2B ecosystem.
- **Simplify EDI Integration via AI:** Empower line-of-business users to handle routine data tasks independently through a conversational AI assistant, boosting operational efficiency and reducing the strain on IT.
- **Gain Total Control on One Platform:** Seamlessly design, deploy, govern and scale both your EDI and application integrations from a single, unified home on the Jitterbit Harmony platform.
- **Deploy Governed, Trustworthy AI:** Leverage a platform built on standard enterprise frameworks to ensure absolute compliance, transparency and risk mitigation across all automated workflows.

“The Jitterbit EDI AI Assistant has been a game-changer for our team, transforming EDI into a self-service operation. Our team no longer needs to be EDI experts or integration specialists to manage complex trading partner data.

They can simply ask a question in natural language and get an actionable answer in seconds. It is removing the technical barriers that used to slow us down, allowing us to focus on growth rather than troubleshooting.”

— **Rich Richardson, President & CEO**
