

# #1

## BACK TO BACK TO BACK

# How We Beat the Pack

Jitterbit has earned its third straight recognition in the G2 Enterprise Implementation Index for iPaaS

### A Top Honor Three-peat

Jitterbit once again beat benchmarks across every category, with a time to go-live that's less than half the industry average.

### Platform-Wide Recognition

Jitterbit's unified Harmony platform continues to stand out across a wide range of categories. For Winter 2026, Jitterbit earned 37 badges across G2's enterprise, mid-market and small business grid reports, including:

#### MARKET LEADERSHIP

- **12 Leader Badges** in key areas like iPaaS, API Management (APIM), Electronic Data Interchange (EDI) and Workplace Innovation
- **16 High Performer Badges** from across iPaaS, APIM, App Development, Low-Code and No-code Development

#### IMPLEMENTATION & ROI EXCELLENCE

- **Best Estimated ROI** earned across iPaaS, Low-Code Development, EDI and APIM
- **Fastest Implementation** in iPaaS and Low-Code Development
- **Most Implementable** in iPaaS

Three quarters of consistent recognition ... is a powerful statement about the tangible value our customers are receiving. This is not a one-time win; it's proof that Jitterbit Harmony is the most reliable, easy-to-adopt, and fastest-to-deploy platform for enterprise integration and automation."

— Jitterbit President and CEO Bill Conner

This third-straight recognition highlights the strength of Jitterbit's approach to integration, automation and app development — empowering organizations to accelerate transformation while maximizing control and flexibility.
