

# Harmony

a unified AI-infused low-code platform

## The Data Divide: A Modern Business Challenge

In today's digital era, businesses are navigating complex hybrid IT environments with countless systems, applications and data sources. Resource constraints, growing systems complexity, data silos and a widening skills gap hinder the advancement of automation initiatives, leading to a data divide that creates challenges for digital transformation.

## Jitterbit Harmony: Bridging the Gap

Jitterbit Harmony provides a new approach to business automation: a unified AI-infused low-code platform for integration, orchestration, automation and app development that accelerates business transformation, boosts productivity and unlocks value.

With robust integration, API management, low-code application development capabilities and EDI solutions, Harmony fuels innovation, streamlines operations and surfaces data-driven insights, empowering organizations to achieve better outcomes faster.

## A Modern Approach to Orchestration

### Unified Platform

An AI-infused unified low-code platform that supports enterprise transformation by enabling organizations to automate and orchestrate critical business processes.

### AI-infused

A choice of AI Assistants speed automation, integration and application development to streamline business processes end-to-end.

### Security First

Based on NIST, CISA, CSA and CERT recommendations, our hybrid security framework is categorized into three layers: physical security, organizational security and logical security.

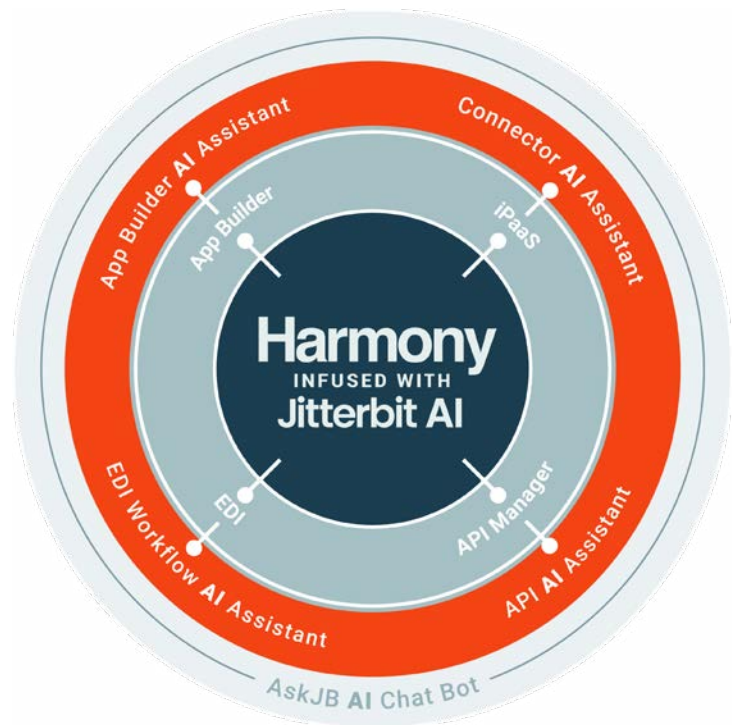

### Ease of Use

An intuitive, responsive user interface that is accessible to both technical and non-technical users.

### Time to Value

Fast time to value with an average **"time to go live" of 1.8 months** – much quicker than the industry average (3.23).\*

\* Based on G2's Summer 2024 Enterprise Results Index for iPaaS.

## A Unified, AI-infused Low-Code Platform

Jitterbit provides a unified AI-infused low-code platform for integration, orchestration, automation and app development that accelerates business transformation, boosts productivity and unlocks value.

### iPaaS

Provides secure, scalable, cloud-native integration, enhancing operational efficiency through seamless connectivity across on-premises and cloud systems with over 250 connectors. Its Intuitive, low-code interface and AI-powered chatbots empower IT and business teams to accelerate deployment, reduce costs, automate processes, drive faster time-to-market, improve agility and reduce technical barriers.

### API Manager

Empowers IT and business users to rapidly build, secure and manage APIs from iPaaS integrations, driving real-time workflow automation. With API Manager, you can quickly expose integrations as APIs with an easy-to-use wizard. Accelerate digital transformation by streamlining API creation, control and consumption. A centralized approach offers comprehensive control, visibility and security over API lifecycle management, fostering innovation and agility.

### App Builder (formerly Vinyl)

Empowers IT and line-of-business teams to create scalable, secure and compliant end-to-end applications fully integrated into your tech stack. Solve complex business problems at scale simply and quickly with web and mobile applications that run on any device. Use AI assistants to create applications as simple as a dashboard and as complex as a system-level enterprise application.

### EDI

Manages B2B transactions in a single, seamlessly integrated platform. Effortlessly connect EDI with ERP systems, automate end-to-end workflows, and easily add new trading partners from our list of more than 1,000 trading partners. Monitor your transactions from a single dashboard and leverage AI-driven insights to optimize workflows, reduce errors and improve supply chain visibility.

## Accelerate Business Transformation

Jitterbit's team of passionate technologists are ready to guide you through any automation challenge, across our entire platform of products. Tailor the level of support to best suit your team's needs.

In addition to the standard support available to all customers, we also provide Premier Support, a tiered offering designed for organizations that desire enhanced support assistance. If you are short on time and resources to build your automations, we offer Professional Services and Enhanced Services, where our team of integration experts steps in to ensure your Jitterbit integrations run smoothly and efficiently.

Jitterbit's AI-infused Harmony platform helps future-proof operations through scalable, reliable, and secure end-to-end integrations. Learn more at [jitterbit.com/harmony](https://jitterbit.com/harmony).

The Jitterbit Harmony platform, including iPaaS, API Manager, App Builder and EDI, future-proofs operations, simplifies complexity and drives innovation for organizations globally. Learn more at [jitterbit.com](https://jitterbit.com) or follow us on [LinkedIn](#).
