

Jitterbit iPaaS

Build, manage and maintain integrations

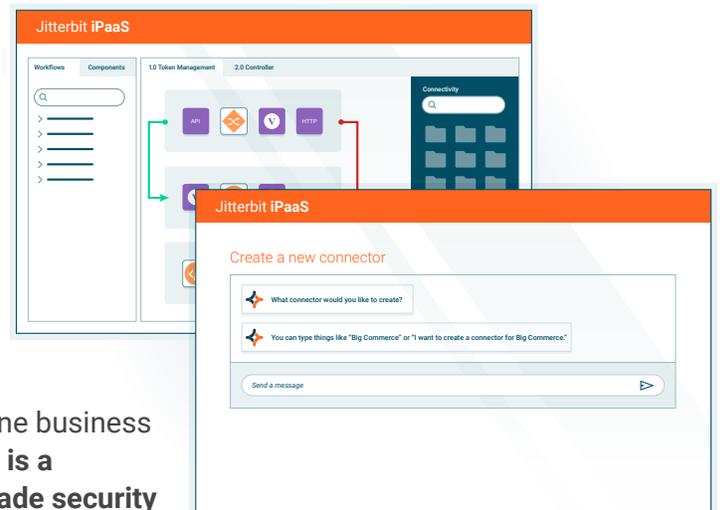

iPaaS plays a crucial role in supporting a company's digital transformation initiatives and automation efforts. By enabling seamless integration and data flow, an iPaaS solution provides companies with increased scalability, efficiency and agility.

Jitterbit iPaaS provides secure and scalable integration, enhancing operational efficiency through seamless connectivity across legacy, on-premises and cloud systems with 400+ connectors and pre-built integrations. An intuitive user interface and AI-powered chatbots empower IT and business teams to accelerate deployment, automate processes and reduce costs.

With Jitterbit iPaaS, you can:

- › **INTEGRATE** data and applications efficiently
- › **MANAGE** and scale your integrations with ease
- › **ACCELERATE** automation with pre-built integrations and AI assistants

Jitterbit iPaaS is a low-code integration platform that lets you integrate systems and automate workflows to streamline business processes across the enterprise. **Additionally, the platform is a scalable, cloud-native solution that provides enterprise-grade security and governance.**

Jitterbit iPaaS provides many benefits for your integration landscape:

- › **Unified Platform:** Build, manage and maintain integrations that seamlessly work with APIM, App Builder and EDI capabilities within the Harmony Platform.
- › **Ease of Use:** Integrate seamlessly across hybrid, cloud and on-premises applications with drag-and-drop simplicity.
- › **Faster Time to Value:** Quickly integrate diverse systems by enabling teams to deploy and optimize workflows collaboratively.
- › **AI Infusion:** Use AI-powered assistants to build connectors. Leverage AI-driven mapping to map complex data with just one click.

Key Features of Jitterbit iPaaS

Design

Design any integration rapidly with our modern graphical interface.

- › Build and maintain integration workflows using an intuitive drag-and-drop interface
- › Process asynchronous messages with the Message Queue Service
- › Utilize standards-based connectivity for rapid integration
- › Enable powerful data transformation logic with efficient mapping

Connect and Create

Connect rapidly with Connector Builder and create deep code-based connectivity with Connector SDK.

- › Build reusable connectors to suit your use case
- › Connect with any REST-based application
- › Enable developers and partners to develop sophisticated connectors
- › Build deep connectivity with the fully documented SDK using the developer portal

Control

Control access for all your integration projects from one place.

- › Move data securely across apps and secure team permissions
- › Set access privileges for components of the platform
- › Create custom roles and manage membership
- › Give users from other organizations secure access

Pre-built Integrations

Pre-built integrations for faster workflow automation.

- › Access hundreds of pre-built application connectors, recipes and templates to create and automate workflows
- › Accelerate connectivity to an application, database or a protocol with pre-built and reusable integrations
- › Automate business processes across systems with pre-built integration use cases

Collaborate

Work together on projects in real-time.

- › Enable multiple users to edit different parts of the same project concurrently
- › Optimize with collaborative working sessions
- › Automatically sync workflow changes in real time
- › Interactively modify logins, workflows and configurations

Monitor and Manage

Monitor and manage the integration projects for the entire organization, online, from a single console.

- › Maintain a clear view of your agents, environments and projects
- › Setup real-time alerts and access a complete audit trail
- › View analytics to monitor the health of your integrations
- › Manage the runtime status of every API operation

Unlock the full potential of your automation initiatives with Jitterbit iPaaS. Visit us now at jitterbit.com/product/ipaas to learn more.

The Jitterbit Harmony platform, including iPaaS, API Manager, App Builder and EDI, future-proofs operations, simplifies complexity and drives innovation for organizations globally. Learn more at jitterbit.com or follow us on [LinkedIn](#).
