

Epicor-BigCommerce Order-to-Fulfillment Process Template

Business Problems Solved:

- Automate the order-to-fulfillment process between your ERP system and e-commerce platform
- Integrate and synchronize data quickly and easily between systems
- Maintain a single source of truth for your data

Package:

- Two endpoints: Epicor ERP, BigCommerce
- Four pre-built integrations
- Delivery Services provided by Jitterbit to deploy the Process Template (optional)

Value to Customers:

1. Packaged solution speeds integration and reduces technical resource requirements
2. Standard objects minimize the need for additional customization
3. Pre-built workflows automate data synchronization between common objects such as Customer, Product, Shipment, and Order
4. Integrated order-to-fulfillment processes eliminate manual data entry, data exports, and costly delays

Business Benefits:

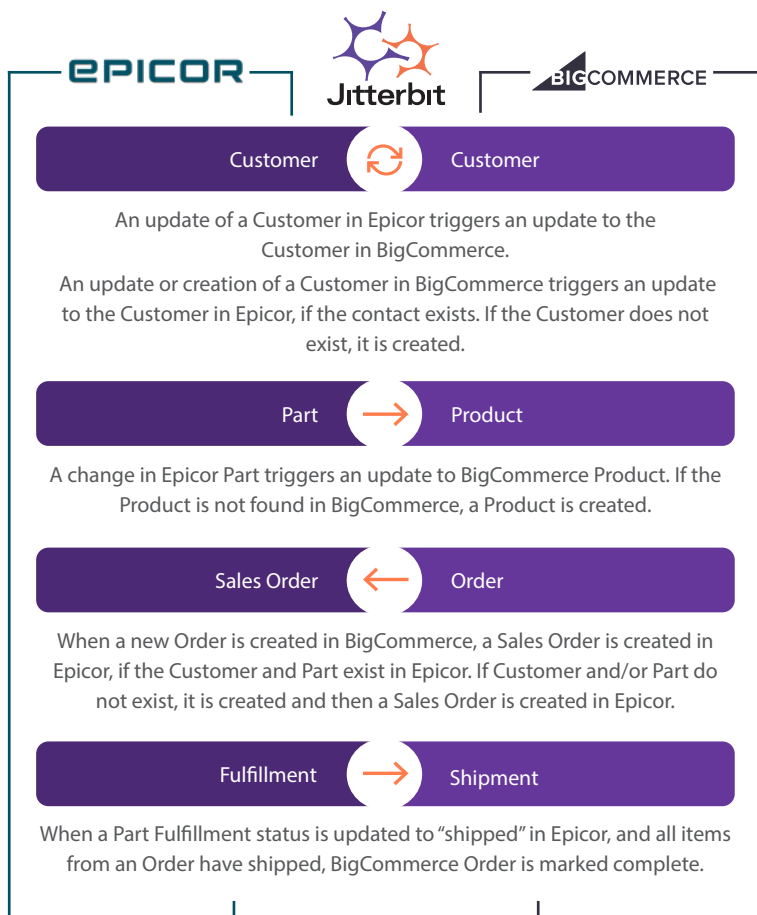

- **Drive greater efficiencies** in sales order fulfillment with a pre-built template that speeds automatic connections to commonly used objects, fields, and processes, and reduces time to deploy by 50-80%
- **Transform operations** with streamlined communications and data integration across business processes
- **Meet rising customer expectations** for a seamless customer experience with quick, cost-effective integration that synchronizes data and processes between workflows

Introduction

Build a connected customer experience with Jitterbit's Epicor-BigCommerce Order-to-Fulfillment Process Template. A packaged solution of pre-built integrations connects data and processes between applications right out of the box, significantly reducing integration efforts. Synchronize customer, product, shipment, and fulfillment status between systems, and automatically create a sales order in Epicor when an order is placed in BigCommerce.

Connect your ERP and e-commerce systems quickly and easily with reusable integrations that speed implementation and streamline business processes.

This template includes pre-built integrations that connect commonly used objects and fields between Epicor ERP and BigCommerce:

The *API Lifecycle* of a Customer

Order-to-Fulfillment

To create a seamless e-commerce experience, you need to connect your storefront to your back-office, automate business processes, and get real-time visibility into your operations. The Epicor-BigCommerce Order to Fulfillment Process Template syncs Customer, Order, Product and Fulfillment data, eliminating manual data entry and provides a single source of truth for your data. When a new order is created in BigCommerce, a sales order is automatically created in Epicor and fulfillment status is updated when parts are shipped. With Jitterbit's Order-to-Fulfillment: Epicor-BigCommerce Process Template you can use pre-built integrations to jumpstart integrations and speed your time to deploy by 50-80%.

About Jitterbit

Jitterbit, the API transformation company, makes it quicker and easier for businesses to exploit data from any source, empowering them to rapidly innovate and make faster, more effective decisions. The Jitterbit API integration platform enables companies to quickly connect SaaS, on-premises, and cloud applications and instantly infuse intelligence into any business process.
