

Epicor-Shopify Order-to-Fulfillment Process Template

Introduction

Build a connected customer experience with Jitterbit's Epicor ERP-Shopify E-Commerce Order-to-Fulfillment Process Template. A packaged solution of pre-built integrations connects data and processes between applications right out of the box, significantly reducing integration efforts. Synchronize customer, product, and fulfillment status between systems, and automatically create a sales order in Epicor when an order is placed in Shopify.

Connect your ERP and e-commerce systems quickly and easily with reusable integrations that speed implementation and streamline business processes. This template includes pre-built integrations that connect commonly used objects and fields between Epicor ERP and Shopify:

BUSINESS PROBLEMS SOLVED:

- Automate the order-to-fulfillment process between your ERP system and e-commerce platform
- Integrate and synchronize data quickly and easily between systems
- Maintain a single source of truth for your data

PROCESS TEMPLATE PACKAGE:

- Two endpoints: Epicor ERP, Shopify
- Four pre-built integrations
- Delivery Services provided by Jitterbit to deploy the Process Template (optional)

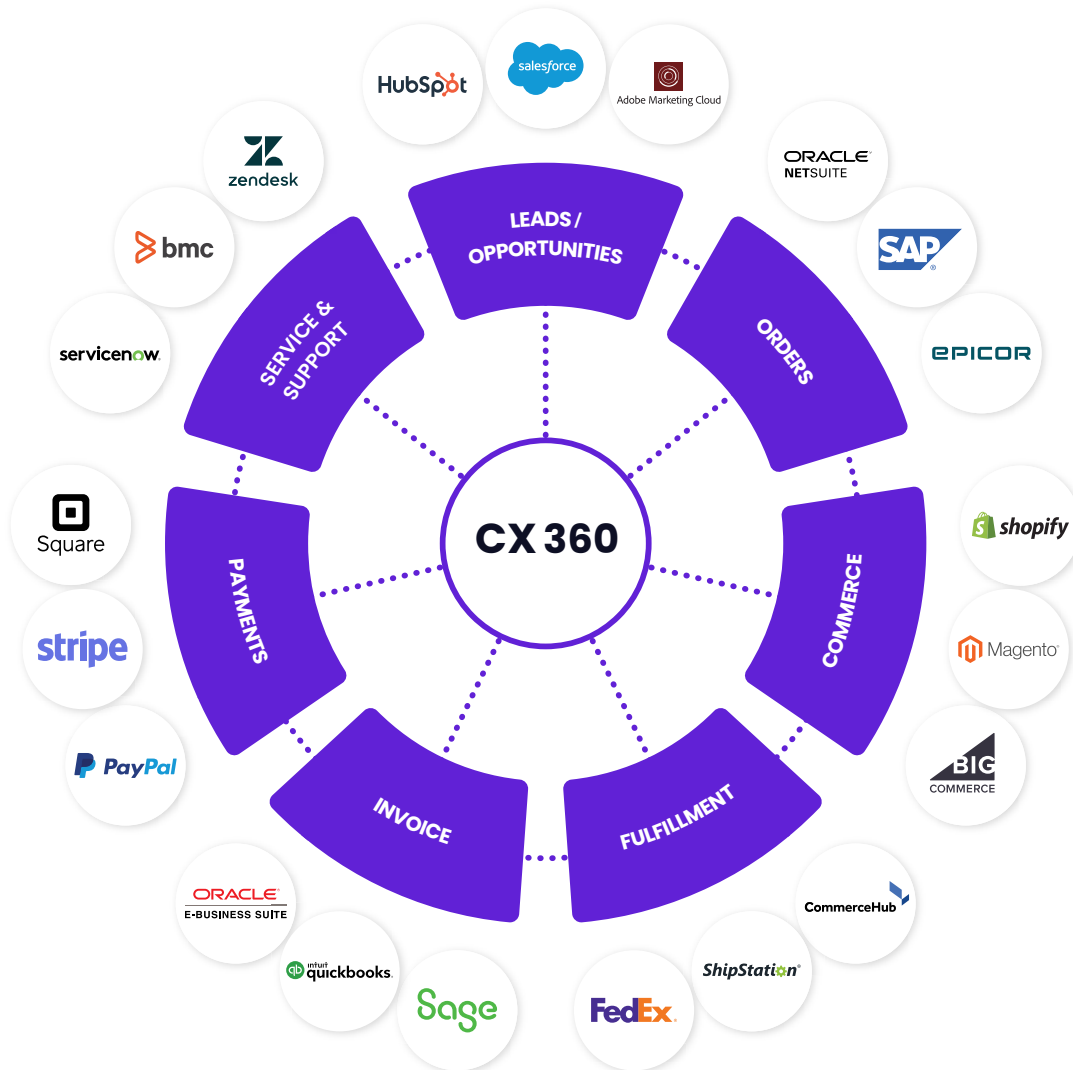

VALUE TO CUSTOMERS:

1. Packaged solution speeds integration and reduces technical resource requirements
2. Standard objects minimize the need for additional customization
3. Pre-built workflows automate data synchronization between common objects such as Customer, Product, Shipment, and Order
4. Integrated order-to-fulfillment processes eliminate manual data entry, data exports, and costly delays

BUSINESS BENEFITS:

- **Drive greater efficiencies** in sales order fulfillment with a pre-built template that reduces custom coding and speeds automatic connections to commonly used objects, fields, and processes
- **Transform operations** with streamlined communications and data integration across business processes
- **Meet rising customer expectations** for seamless order-to-fulfillment process with quick, cost-effective integration that synchronizes data and processes between workflows

The API Lifecycle of a Customer

Order-to-Fulfillment

To create a smooth e-commerce experience, you need visibility into the end-to-end customer journey. The Epicor-Shopify Order-to-Fulfillment Process Template syncs customer, order, part, and product data, eliminating manual data entry and providing a single source of the truth for your data. When a new order is created in Shopify, a sales order is automatically created in Epicor and fulfillment status is updated when parts are shipped. With Jitterbit's Epicor-Shopify Order-to-Fulfillment Process Template you get rapid ROI with pre-built integrations that accelerate your time to deploy by 50-80%.

Jitterbit empowers businesses to optimize their connectivity and scalability through a single integration and workflow automation platform. Our mission is to turn complexity into simplicity so your entire organization can work faster and more efficiently.
