

# Microsoft Dynamics Business Central – Shopify Order-to-Fulfillment Process Template

## Business Problems Solved:

- Connect ERP and e-commerce systems to share data and automate processes
- Integrate and synchronize data and processes quickly and easily between systems
- Maintain a single source of truth for your data

## Process Template Package:

- Two endpoints: Microsoft Dynamics Business Central, Shopify
- Four pre-built integrations
- Delivery services provided by Jitterbit to deploy the Process Template (optional)

## Value to Customers:

- Packaged solution speeds integration and reduces technical resource requirements
- Standard objects minimize the need for additional customization
- Pre-built workflows automate data synchronization between common objects such as Customer, Product, Order and Fulfillment
- Integrated processes eliminate manual data entry, data exports, costly delays

## Business Benefits:

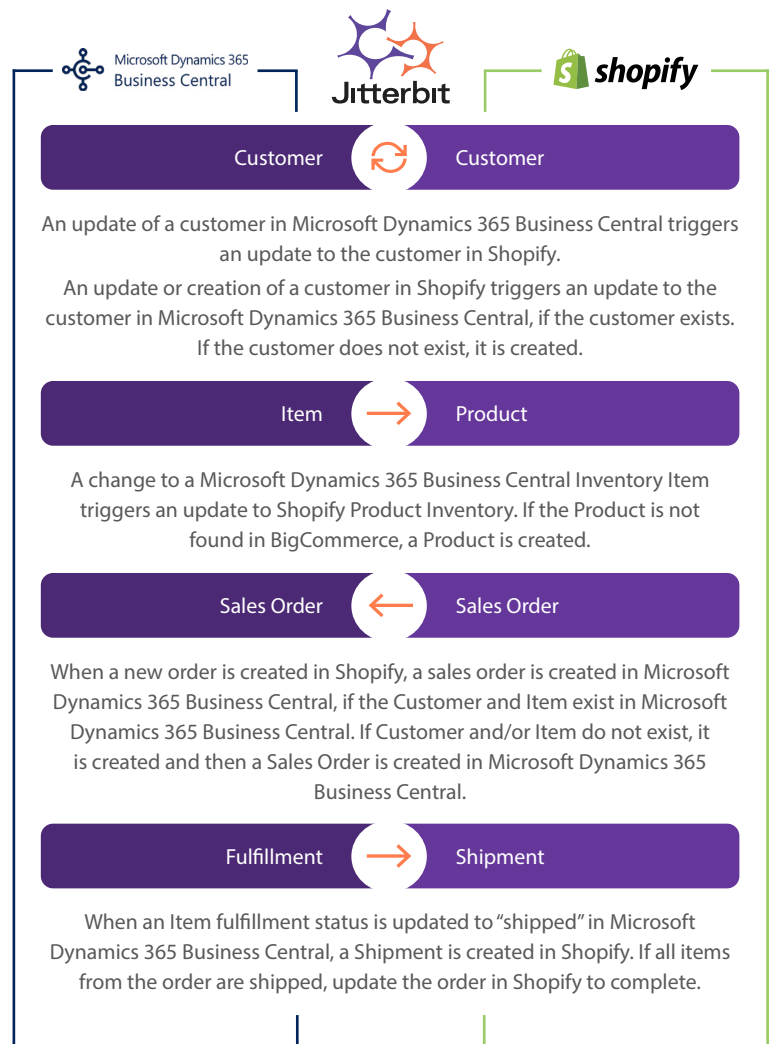

- **Drive greater efficiencies** in sales order automation with a pre-built template that speed integration implementation to commonly used objects, fields, and processes reducing time to deploy by 50-80%
- **Enable faster time to value** with pre-packaged data integration that enables a seamless user experience for sales order automation in days, not weeks
- **Transform operations** with the fast set-up of automated data synchronization reducing manual data entry, data errors, and costly delays

## Introduction

Build a connected customer experience with Jitterbit's Microsoft Dynamics Business Central – Shopify Order-to-Fulfillment Template. A packaged solution of pre-built integrations connects data and processes between applications right out of the box, significantly reducing integration efforts. Synchronize item, products, customer, sales order, and fulfillment status between systems, and automatically create a sales order when a new order is created in Shopify.

Connect your ERP and e-commerce systems quickly and easily with reusable integrations that speed implementation and streamline business processes.

This template includes pre-built integrations that connect the following objects and fields between Microsoft Dynamics Business Central and Shopify:

## The *API Lifecycle* of a Customer

## Order-to-Fulfillment

To create a seamless e-commerce experience, you need to connect your storefront to your back-office, automate business processes, and get real-time visibility into your operations. The Microsoft Dynamics 365 Business Central – Shopify Order to Fulfillment Process Template syncs item, products, customer, sales order, and fulfillment data, eliminating manual data entry and provides a single source of truth for your data. When a new order is created in Shopify, a sales order is automatically created in Microsoft Dynamics 365 Business Central and fulfillment status is updated when parts are shipped. With Jitterbit's Microsoft Dynamics 365 Business Central – Shopify Order-to-Fulfillment Process Template you can use pre-built integrations to jumpstart integrations and accelerate your time to market.

## About Jitterbit

Jitterbit, the API transformation company, makes it quicker and easier for businesses to exploit data from any source, empowering them to rapidly innovate and make faster, more effective decisions. The Jitterbit API integration platform enables companies to quickly connect SaaS, on-premises, and cloud applications and instantly infuse intelligence into any business process.
