

NetSuite–Shopify Order-to-Fulfillment Process Template

Introduction

Build a connected customer experience with Jitterbit's NetSuite – Shopify Order-to-Fulfillment Process Template. A packaged solution of pre-built integrations connects data and processes between applications right out of the box, significantly reducing integration efforts. Synchronize customer, product, shipment, and fulfillment status between systems, and automatically create a sales order in your ERP system when an order is placed in your e-commerce platform. Connect your ERP and e-commerce systems quickly and easily with reusable integrations that speed implementation and streamline business processes. This template includes pre-built integrations that connect commonly used objects and fields between NetSuite ERP and Shopify:

BUSINESS PROBLEMS SOLVED:

- Automate the order-to-fulfillment processes between your ERP system and e-commerce platform
- Integrate and synchronize data quickly and easily between systems
- Maintain a single source of truth for your data

PROCESS TEMPLATE PACKAGE:

- Two endpoints: NetSuite ERP, Shopify
- Four pre-built integrations
- Delivery services provided by Jitterbit to deploy the Process Template (optional)

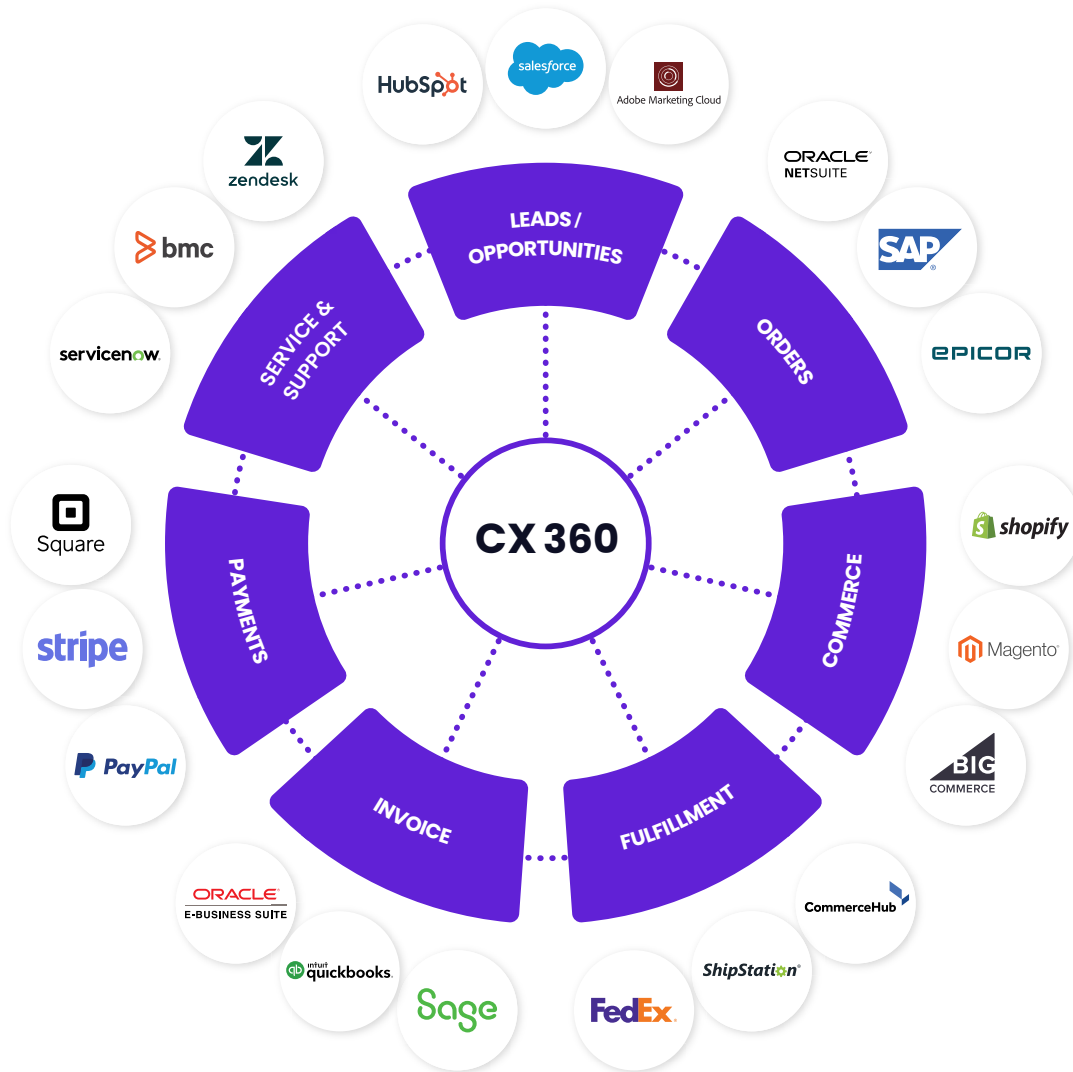

VALUE TO CUSTOMERS:

1. Packaged solution speeds integration and reduces technical resource requirements
2. Standard objects minimize the need for additional customization
3. Pre-built workflows automate data synchronization between common objects such as Customer, Product, Shipment, and Order
4. Integrated order-to-fulfillment processes eliminate manual data entry, data exports, and costly delays

BUSINESS BENEFITS:

- Drive greater efficiencies in sales order fulfillment with a pre-built template that reduces custom coding and speeds automatic connections to commonly used objects, fields, and processes
- Transform operations with streamlined communications and data integration across business processes
- Meet rising customer expectations for seamless order-to-fulfillment process with quick, cost-effective integration that synchronizes data and processes between workflows

The API Lifecycle of a Customer

Order-to-Fulfillment

To create a seamless e-commerce experience, you need to connect your storefront to your back-office, automate business processes, and get real-time visibility into your operations. The NetSuite-Shopify Order to Fulfillment Process Template syncs Customer, Order, Product and Fulfillment data, eliminating manual data entry and provides a single source of truth for your data. When a new order is created in Shopify, a sales order is automatically created in NetSuite and fulfillment status is updated when parts are shipped. With Jitterbit's NetSuite-Shopify Order-to-Fulfillment Process Template you get rapid ROI with pre-built integrations to accelerate your time to deploy by 50-80%.

Jitterbit empowers businesses to optimize their connectivity and scalability through a single integration and workflow automation platform. Our mission is to turn complexity into simplicity so your entire organization can work faster and more efficiently.
