

Salesforce–Microsoft Dynamics 365 Business Central CPQ to Billing Process Template

Introduction

Improve the speed and accuracy of your orders and billing with Jitterbit’s Salesforce–Microsoft Dynamics 365 Business Central CPQ to Billing Process Template. A pre-built process template connects data and processes between applications right out of the box, significantly reducing integration efforts. Synchronize Customers, Products, Price Books, Orders and Invoices between systems. Automatically process and create your orders and invoices, reducing time-consuming manual processes and costly errors. Update the order status depending if orders partially or completely fulfilled. Connect your CRM and ERP systems quickly and easily with reusable integrations that speed implementation and streamline business processes. Errors and exceptions are also logged, and the corresponding email is sent. On success, an email is sent, notifying the user.

This template includes pre-built integration use cases that connect the following objects and fields between Salesforce and Microsoft Dynamics 365 Business Central.

BUSINESS PROBLEMS SOLVED:

- Automatically process your orders and invoices in Salesforce CPQ & Billing and Microsoft Dynamics 365 Business Central
- Synchronize data and processes quickly and easily between systems
