

Intelligent Automation. Accountable Control.

Jitterbit Harmony is a unified orchestration and automation platform designed to maximize AI accountability while eliminating barriers to use. By combining low-code and AI capabilities, Harmony unifies the entire automation lifecycle — allowing even nontechnical users to build intelligent apps, connect them to agents, expose them as APIs and seamlessly integrate systems across the enterprise.

Harmony Platform

Jitterbit has earned Best ROI badges across the entire Harmony platform.*

iPaaS

Seamless data integration and complex workflow orchestration across hybrid, cloud and on-prem apps.
Average time to go live: 1.7 months (vs. 3.5 months industry average)

iPaaS AI Assistant

Build connectors and map complex data with just one click.

API Manager

Build, publish, manage and maintain APIs through a modern, user-friendly interface that offers complete visibility across every stage of the API lifecycle.
Average time to ROI: 6.4 months (vs. 16.5 months industry average)

APIM AI Assistant

Use a generative AI-powered assistant to accelerate development, management and maintenance of APIs.

EDI

Manage B2B transactions, effortlessly connect EDI with ERP systems, automate end-to-end workflows, and leverage our list of over 1,000 pre-built trading partners.
Average time to go live: 2.4 months (vs. 3.1 months industry average)

EDI AI Assistant

Use genAI assistant to accelerate creation, management, and maintenance of B2B trading partners and transactions.

App Builder

Create, manage and deploy secure, device-agnostic web, mobile and system apps using low code or AI.
Average time to ROI: 1.9 months (vs. 14.9 months industry average)

App Builder AI Assistant

Build applications using natural language, enabling teams to speed up app development.

Jitterbit Harmony

Jitterbit Harmony is a unified, AI-infused, low-code platform combining iPaaS, full API lifecycle management, app development, and EDI to power intelligent automation. With embedded agentic AI — including pre-built and custom AI agents, AI assistants and MCP services — it orchestrates complex workflows at scale while empowering developers and citizen technologists. Enterprise-grade security, ISO 42001 certification, governance, AI accountability and agent observability ensure trusted, transparent automation that delivers real business outcomes.

Jitterbit App Builder

Jitterbit App Builder accelerates app development, empowering developers and citizen developers with an AI Assistant that guides them to build faster. It enables creation, management and deployment of responsive, device-agnostic web, mobile and system apps. Integration delivers real-time, bi-directional data flow, while enterprise-grade security, monitoring and auditing ensure compliance and enable teams to deliver scalable, secure apps with personalized, high-impact user experiences.

Jitterbit iPaaS

Jitterbit iPaaS and API Manager with full lifecycle API management enables seamless data integration and complex workflow orchestration at scale. Its iPaaS AI Assistant helps users create, streamline and maintain integrations, while the API AI Assistant empowers them to build, publish, manage and maintain APIs. Centralized control, AI-driven insights and event-driven workflows help teams enforce API governance and achieve measurable business impact.
